- B.S. Information Systems Management (Summa Cum Laude), Salisbury University

Dominick V. Bellia, CPA, CITP, tactfully combines his business acumen and technology insight to ensure client organizations achieve even the most complex goals, understanding the intricacies and interconnectedness of both business and technology. With joint analytical and advisory capabilities, in addition to a keen sense of strategy and tactics, Dominick has worked extensively with organizations in the not-for-profit, professional services, healthcare and construction sectors for more than 20 years.

Dominick seamlessly incorporates his background in technology to develop efficient exchanges of digital information, regardless of where the client physically operates, as a partner and director of Councilor, Buchanan & Mitchell (CBM)'s client accounting and advisory services (CAAS).

In addition to providing clients with tax, accounting and financial reporting services, he has solidified his reputation as a leading collaborator and master of high-level planning and strategy within the accounting profession.

Before spearheading and leading CBM's CAAS services, Dominick guided a prominent firm on the Eastern Shore of Maryland away from paper-based methods to cloud-based solutions, resulting in more efficient and effective processes, enhanced customer service, and increased client interactions. To bring similar benefits to CBM and the firm's clients, Dominick designed CAAS with a full spectrum of targeted and proactive service offerings aimed at helping clients outsource their accounting functions while avoiding outdated systems and skillsets.

In addition to being a certified public accountant, Dominick is a certified information technology professional, a designation sponsored by the American Institute of CPAs. This combination has led him to view technology as a tool to optimize business processes and reduce the unnecessary stress and burdens that business owners and managers often endure.

Consistent with his desire to continually enrich his professional knowledge, Dominick enjoys traveling to new places to gain historical understandings of cultures worldwide. When looking for a more tranquil experience, he enjoys taking a tropical holiday or listening to an engaging nonfiction or historical audiobook.
